

Quality policy

At Algeco Nordics, quality is integral to the success of our business and is a shared responsibility of all our employees, contractors, and suppliers.

We define quality as: All documents, procedures, instructions in our Quality Management system, not material deviations in projects.

Our quality objectives strive to achieve:

- Continual improvement in all aspects of design, manufacture, hire, installation & service.
- Fully supported and trained workers for the tasks they perform.
- Relationships with suppliers and interested parties that assist us in delivering high quality products and services that we aim to provide for our customers.
- Clearly specified work practices, standards of performance and implemented policies and procedures.
- Regular review of our quality objectives and systems through analysis, review of feedback from customers and interested parties and third-party verification.
- Regular review of our performance through internal and external audits.
- Regular review by our customers to ensure we remain committed to their needs.
- Compliance with relevant national, state and territories legislation and standards.
- Quality processes to ensure continued maintenance of our fleet.
- Refined processes complying with the requirements of ISO9001:2015 and to enhance the efficient operation of the business.
- Compliance to the New Algeco Nordics Management System.

Algeco Nordics aim to continue to satisfy the requirements of our customers and return value for our shareholders.

Accountability for our quality management rests with the Executive & Senior Leadership Teams, and responsibility for the implementation of Algeco Nordics quality management processes is shared with all managers, supervisors, and team leaders across all operations.

Algeco Nordics expect our employees and contractors to comply with our quality policies and procedures.
